Chicago Crime & Socioeconomic Analysis

SQL Query Findings Report

This report summarizes the results of six analytical SQL queries performed on cleaned Chicago crime, school, and socioeconomic datasets.

Query 1 — Crime Trends Analysis (2016–2025)

Objective

Analyze long-term crime patterns and identify rising or declining crime categories.

Result

Key Findings

Three major patterns stand out:

First, weapons-related crimes are rising fast. Concealed carry violations and weapons offenses have both increased significantly over the decade. This suggests more illegal guns on the streets.

Second, car theft has become a much bigger problem. The numbers show a clear upward trend, especially in recent years.

Third, violent crimes like homicide and robbery have actually decreased. This is good news — fewer people are being murdered or robbed compared to 2016.

Strategic Implication

The city made progress on classic street crimes (robbery, burglary, narcotics, homicide), but new or emerging issues (guns, stalking, car theft) are rising and need more focus.

Decision-makers could prioritize weapons enforcement and stalking prevention programs.

Query 2 — Crime and Poverty Relationship

Objective

Examine the relationship between crime rates and poverty across Chicago's 77 community areas.

Result

Key Findings

Looking at the data, three things really stand out.

For one, the neighborhoods with the most crime are usually the poorest ones. Places like North Lawndale and Englewood are at the top of the list for both, mostly because people there are really struggling.

But then you have areas like the Loop or the Near North Side. These places have a lot of crime but very little poverty. It’s mostly because they’re busy downtown spots with tons of shops and people, so the crime there is just a different kind.

What’s also interesting is that a few spots, like Riverdale, have a ton of poverty but way less crime than you’d think. It goes to show that being poor doesn't always mean an area will be dangerous—some of these communities are actually pretty quiet.

Strategic Implication

Different neighborhoods need different solutions.

The critical areas need everything — police, social services, jobs.
Downtown areas need stronger policing strategies.
Poor but safe areas need economic support, not increased enforcement.

Query 3 — Community Risk Segmentation

Objective

Classify communities into risk categories based on combined crime and poverty indicators.

Result

community_area	community_area_name	total_crimes	poverty_rate	unemployment_rate	per_capita_income	hardship_index	crime_z_score	poverty_z_score	unemployment_z_score	risk_score	risk_category	community_profile

Community Risk Groups Identified

Group 1: High Crime, Low Poverty

Austin, the Loop, and Near North Side fall into this category. These areas have high crime but normal or low poverty. Crime here is likely driven by density, businesses, and property-related offenses.

Group 2: High Poverty, Low Crime

Riverdale and Fuller Park show extreme poverty and unemployment, but crime remains below average. Poverty alone does not automatically cause crime. These communities need jobs and social services, not increased policing.

Group 3: High Crime AND High Poverty

Englewood, West Englewood, and North Lawndale experience high crime, high poverty, and high unemployment simultaneously. These are the communities that require the most comprehensive intervention.

Strategic Implication

Communities cannot be treated the same.

- Group 1 needs targeted policing
- Group 2 needs economic development
- Group 3 requires a combined strategy (law enforcement + social investment)

Query 4 — School Performance in High vs Low Crime Areas

Objective

Compare educational outcomes between the 15 highest-crime and 15 lowest-crime communities.

Result

area_type	number_of_schools	avg_safety_score	avg_math_pct	avg_reading_pct	avg_attendance	avg_misconduct_rate	avg_poverty_pct
Low Crime Areas (Bottom 15)	40	67,5	29,7	25	93,1	8,4	13,9
High Crime Areas (Top 15)	188	45,8	17,9	14,2	91,3	28	27,9

Key Findings

The differences are significant :

- School safety scores are much lower in high-crime areas (45 vs 67)
- Math performance is nearly half (18% vs 29%)
- Behavior issues are three times higher

Children in these neighborhoods do not feel safe, and it is affecting academic performance.

Poverty in high-crime areas (28%) is double that of safe areas (14%). This suggests multiple overlapping disadvantages.

Strategic Implication

Improving schools in high-crime neighborhoods requires more than policing.

These schools need:

- Social workers
- Counselors
- Food assistance programs
- Academic intervention support

School performance and neighborhood conditions are deeply connected.

Query 5 — Crime Concentration by Income Level

Objective

Identify which crimes are disproportionately concentrated in poor vs non-poor communities.

Result

crime_type	count_poor_areas	count_non_poor_areas	total_crimes	pct_in_poor_areas	city_poverty_rate	concentration_ratio	concentration_category
GAMBLING	491	329	820	59.9%	30.5%	1,96	Highly Concentrated in Poor Areas

LIQUOR LAW VIOLATION	460	1592	2052	22.4%	30.5%	0,74	More Common in Non-Poor Areas
THEFT	112612	456476	569088	19.8%	30.5%	0,65	More Common in Non-Poor Areas
DECEPTIVE PRACTICE	34700	147338	182038	19.1%	30.5%	0,63	More Common in Non-Poor Areas

Key Findings

Crimes Most Concentrated in Poor Neighborhoods

- Homicide (52% more common)
- Drug crimes (nearly double the average)
- Gambling

Violence reduction efforts should prioritize these communities.

Crimes Spread Across the City

Assault, robbery, and car theft occur at similar rates across income levels. These require citywide solutions.

Crimes More Common in Wealthier Areas

- Theft
- Scams / deceptive practices

These require strategies such as improved commercial security and fraud awareness campaigns.

Strategic Implication

Different neighborhoods require different prevention strategies.
The data clearly shows where to focus each type of intervention.

Query 6 — Executive Summary Dashboard Metrics

Result

Report_title	Report_date	Total_Crimes_2016_2025	Crimes_In_2025	Crime_Change_5yr	Communities_Affected_Recent	Total_Schools	City_Avg_Safety_Score	City_Avg_Math_Score	City_Avg_Poverty_Rate	Critical_Risk_Communities	High_Risk_Communities

Top_5_Vulnerable_Areas	Fastest_Increasing_Crimes	Biggest_Decreasing_Crimes	Crimes_Most_Concentrated_in_Poor_Areas	Crimes_More_Common_in_Non_Poor_Areas	Safety_High_Crime_Areas	Safety_Low_Crime_Areas	Safety_Gap	Math_High_Crime_Areas	Math_Low_Crime_Areas	Math_Gap
Humboldt Park, Austin, West Garfield Park, East Garfield Park, North Lawndale	CONCEALED CARRY LICENSE VIOLATION (+669.44%), STALKING (+221.02%), NON-CRIMINAL (+200%)	GAMBLING (-93.12%), PROSTITUTION (-76.38%), KIDNAPPING (-55.94%)	GAMBLING (1.96x), NARCOTICS (1.88x), HOMICIDE (1.52x)	DECEPTIVE PRACTICE (0.63x), THEFT (0.65x), LIQUOR LAW VIOLATION (0.74x)	45.8	67.5	21.7	17.9	29.7	11.8

Overall Findings

The Good News: Crime has decreased by approximately 6% over the last five years. Gambling, prostitution, and kidnapping are significantly down.

The Bad News: Concealed carry violations are up 669%. Stalking has increased 221%. Illegal gun presence is a growing concern.

Where to Focus: Fourteen communities require immediate attention — especially Humboldt Park, Austin, and North Lawndale.

Schools Are Struggling: High-crime areas show:

- 21-point lower safety scores
- 12-point lower math proficiency

Final Strategic Recommendation

Focus on:

- Gun violence reduction in high-poverty areas
- Theft prevention in wealthier areas
- Closing the school safety and achievement gap

The data provides a clear roadmap for targeted, community-specific action.
